How to Install iPoint on your iPad/iPhone

This guide will walk you through the process of installing iPoint on your iOS device. Before you begin make sure that you have the following:

- Your iPoint user name and password

- iPoint server name, and iPoint file name

  - Contact iPoint Support for these: support@ipointcontrol.com or (800) 535-4101 ext 1

Once you have this information you are ready to begin.

1) Download the FileMaker Go 15 app to your device from the App Store

2) Open FileMaker Go 15

3) Click the file folder on the top left of the screen and click "Launch Center"

4) Click on "Device" on the bottom of the screen

5) Swipe left across each file and click "Delete"

6) Click on "Hosts" on the bottom of the screen

7) Click "Hosts" on the top left corner of the screen

8) Click the "+" sign to add your host

9) Enter in the server name in the Host Address field

   1) Server name is provided by iPoint Support

10) Click "Save" in the top right

11) Enter in your username and password and select "Save in Keychain"

12) Find your file name in the list of files and select it.

   1) File name is provided by iPoint Support

13) Enter in your iPoint username and password and select "Save in Keychain

14) Click "Log In" in the top right corner

   1) DON'T CLICK "LOGIN AS GUEST"

15) You will be prompted to enter in a name for this device (i.e. "Rob's iPad")

You successfully installed iPoint!!!
To open iPoint in the future, simply click on your file name from your recent files list.
